

ENERGETSKI PORTAL SRBIJE

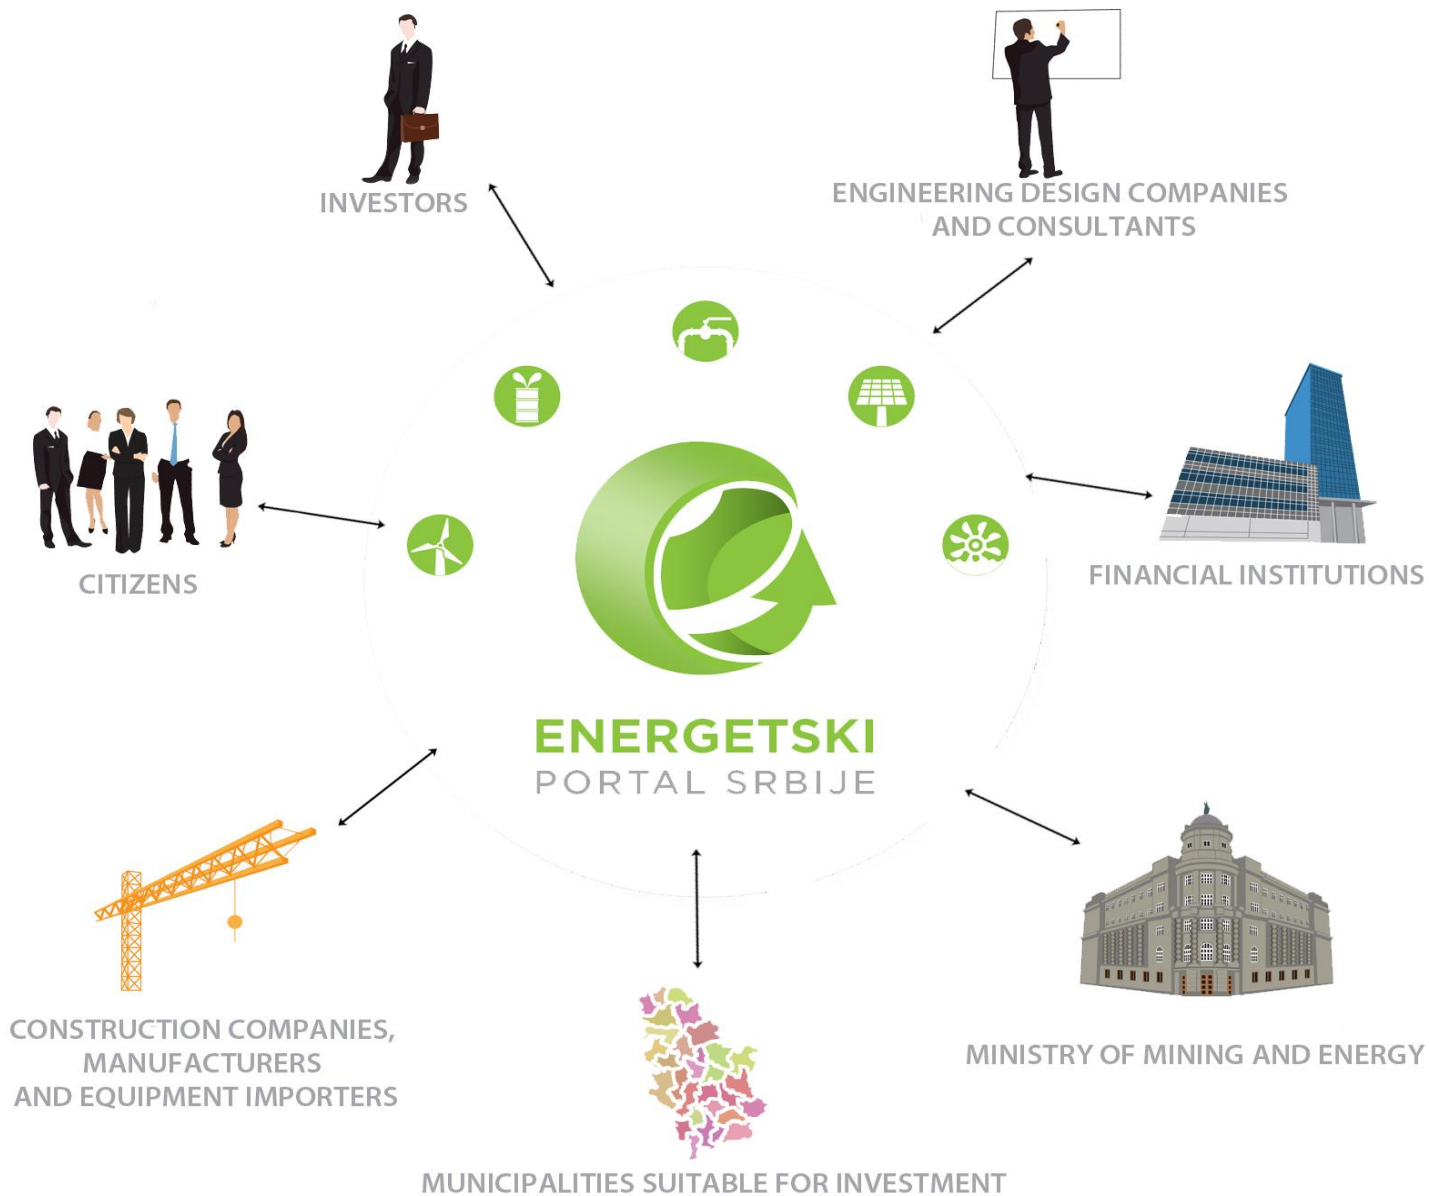

BUSINESS PORTAL ON **CLEAN** ENERGY

ABOUT US

Energy portal (EP) is a specialized public **broadcasting medium on sustainable energetics** that daily updates the most important news and information necessary for **investors** and other parties in renewable energy sources (**RES**), improvement of energy efficiency in industry, transportation and buildings (**EE**) in Serbia interested in production of “clean” energy, energy efficiency improvement and sustainable development.

EP is the mediator for implementation of sustainable projects and cost-effective “green” investments. It is also a guide through **regulations, procedures, materials, design, technologies, research, sources of funding...**

ENERGETSKI PORTAL'S WIDER TOPICS :

- RENEWABLE ENERGY SOURCES
- ENERGY EFFICIENCY
- ENVIRONMENTAL PROTECTION
- WASTE MANAGEMENT

MISSION

Mission of Energy portal is to:

- Inform investors about the procedures with a view to implement projects and investments in the field of RES,
- Gather people, funds and resources on **sustainable projects** with the aim of their implementation;

VISION

Creating sustainable, humane, energy independent, economically stable and environmentally aware community by promoting renewable energy sources, energy efficiency, waste management and environmental protection.

OBJECTIVES

- Accumulation of information on projects, innovations, procedures, investments and the news in the field of RES and EE;
- Raising awareness and expanding the knowledge of RES and EE, with systematic support to development of the scientific and educational institutions dedicated to 'green' energy;
- Motivating individuals to invest in RES and EE; and encouraging the development of the domestic industry in accordance with the development of the domestic energy sector;
- Connecting investors, banks and project holders with the aim to create common sustainable projects in the field of RES
- Initiating the development of sustainable financial mechanisms and establishing the confidence in banks' support of RES and EE sectors;
- We try to improve the environment through the promotion of 'clean' energy and thus reducing the emissions of CO₂ and other harmful products of fossil energy use;

OBJECTIVES

- Advancing towards the European standards of living in an eco-friendly environment;
- Initiating systemic regulatory and legislative changes with the aim of improving the conditions and simplifying the procedures and regulations for the production of energy from renewable resources, restoring thus the trust in institutions.

ENERGETSKI PORTAL CONTAINS INFORMATION ON:

- News on RES and EE and ongoing research projects,
- Technical potential of RES in Serbia, standards and energy class,
- Current quotas and “feed-in” tariffs,
- Implemented and planned RES projects,
- Interaction: Find an investor – Invest in a project,
- Legislations, procedures and expert advice
- Financing (credit lines and funds),
- General tenders and public calls,
- Sustainable development (waste management, environmental protection)
